LUFFI TECH

AI AUTOMATION & SOFTWARE STUDIO

CORPORATE BUSINESS PROFILE

Capabilities Statement • Solutions Architecture • Tech Academy

[01 • CORE ENGINEERING]

Custom Software & SaaS Platforms

Scalable Next.js, React, Node.js & Python architectures with high-concurrency PostgreSQL databases and SSR edge performance.

[02 • FINTECH RAILS]

M-Pesa Daraja 2.0 & Global Payments

Automated STK Push prompts, C2B webhooks, B2C supplier disbursements, Stripe rails, and Africa's Talking USSD/SMS services.

[03 • ARTIFICIAL INTELLIGENCE]

Autonomous AI Agents & Workflows

Private RAG document intelligence, 24/7 intelligent WhatsApp conversational bots, and n8n background task workers.

[04 • WORKFORCE ACADEMY]

Luffi Tech Academy & Mentorship

Outcome-based practical coding for youth (ages 7–18), digital workplace literacy, and intensive fullstack bootcamps.

"Elite Tech. Human Prices. Where Technology Meets Humanity."

SECTION 01 • CORPORATE FOUNDATION

Executive Overview & Strategic Philosophy

Luffi Tech is an agile, multi-disciplinary technology studio and engineering academy headquartered in Nairobi, Kenya. We engineer high-performance custom web applications, financial technology gateways (M-Pesa Safaricom Daraja), autonomous AI workflows, and cloud architectures for scaling enterprises, startups, and institutions across East Africa and globally.

OUR MISSION

Democratizing Access to Premium Engineering

To empower ambitious businesses, startups, and learners with enterprise-grade digital systems, financial automations, and practical technical education without corporate markups, sales middlemen, or hidden consulting overhead.

OUR VISION

A Borderless, Barrier-Free Digital Future

We envision a commercial landscape where technical barriers cease to exist—where every enterprise operates automated, scalable software, and every aspiring builder has access to elite engineering skills.

OUR 4 UNCOMPROMISING ARCHITECTURAL COMMITMENTS

1. 100% IP & Code Ownership
Clients retain full ownership of source code, repositories, database schemas, and IP from Day 1. Zero proprietary vendor lock-in.

2. Transparent Milestone Billing
Invoices are strictly tied to verified working software milestones. Transparent sprint pricing with zero surprise fees.

3. Direct Senior Architect Access
Clients collaborate directly with senior lead engineers. No non-technical account managers or distorted communication channels.

4. High-Velocity Agile Delivery
A borderless, lean framework that cuts bureaucratic drag, deploying production-tested software in weeks rather than quarters.

SECTION 02 • ENGINEERING EXCELLENCE

Enterprise Software & FinTech Architecture

We engineer production-grade digital infrastructure across four specialized technological pillars, integrating modern architectural standards with East African telecommunications and financial rails.

1. CUSTOM ENTERPRISE SOFTWARE & SAAS PLATFORMS

WEB & CLOUD ARCHITECTURE

Focus: Enterprise SaaS systems, operational web platforms, administrative portals, and customer-facing apps.
Technical Stack: Next.js, React, TypeScript, Tailwind CSS, Python (Django & FastAPI), Node.js, PostgreSQL, Redis, MongoDB.
Deliverables: Server-Side Rendered (SSR) web applications, progressive web apps (PWAs), high-concurrency database schemas, RESTful & GraphQL APIs, role-based access control (RBAC), and technical SEO optimization.

2. SAFARICOM M-PESA DARAJA 2.0 & FINTECH GATEWAYS

MOBILE MONEY RAILS

Focus: Automated payment rails bridging regional mobile money channels and international banking processors.
Integrations: Safaricom Daraja API 2.0 (Automated STK Push, C2B Paybill & Till confirmation webhooks, B2C automated disbursements, Transaction Status & Reversal APIs), Stripe Checkout, Visa, Mastercard, and PayPal.
Offline Rails: Interactive USSD menus and Transactional Bulk SMS via Africa's Talking API for feature-phone users.

3. CLOUD INFRASTRUCTURE, DEVOPS & MANAGED IT

99.9% UPTIME SLA

Focus: Hardened production deployment, 99.9% uptime architectures, and continuous security monitoring.
Capabilities: AWS, DigitalOcean, Linux server administration, Docker containerization, automated CI/CD pipelines, SSL/TLS certificate management, firewall configuration, and automated multi-region backup topologies.

SECURITY & COMPLIANCE STANDARDS

- Strict TLS 1.3 encryption for all web & API traffic.
- Isolated database vector storage for private data.
- Non-Disclosure Agreements (NDAs) standard.
- PCI-DSS compliant financial transaction handoffs.

PERFORMANCE BENCHMARKS

- Sub-1.0s page loads via SSR & edge caching.
- 99.9% cloud server uptime guarantee.
- Automated multi-region database snapshot backups.
- 100% compliant mobile-first responsiveness.

SECTION 03 • ARTIFICIAL INTELLIGENCE

Autonomous AI Agents & Workflow Automation

We deploy pragmatic, production-tested AI systems designed for measurable business impact. Our autonomous workflows eliminate repetitive administrative toil, accelerate customer interactions, and safeguard your proprietary company data.

PRIVATE RAG

Document Intelligence

Vector search over internal corporate PDFs, contracts, manuals, and databases. Fast, verifiable answers with zero public data leakage.

WHATSAPP AGENTS

24/7 Conversational AI

Intelligent customer assistants that handle multi-lingual inquiries, qualify leads, and issue instant M-Pesa checkout prompts inside WhatsApp.

ETL PIPELINES

Autonomous Task Workers

Scheduled n8n and Python background engines that automate invoice parsing, CRM synchronization, inventory alerts, and reconciliation.

ENTERPRISE AI GOVERNANCE & ZERO-DATA LEAK PROTOCOL

Zero Public Foundation Training

Commercial API configurations with strict zero-data retention clauses. Your enterprise knowledge is never ingested into public models.

Isolated Vector Databases

Self-hosted pgvector & Qdrant databases with encryption-at-rest and strict tenant partition schemas.

Deterministic Prompt Guardrails

Rigorous prompt routing, fallback mechanisms, and human-in-the-loop triggers for high-stakes decisions.

Transparent Audit Logging

Full transparent traceability of prompt inputs, token usage, and agent decision chains for corporate governance.

70%	15+ hrs	100%
Faster Resolution	**Weekly Labor Saved**	**Data Sovereignty**
Instant WhatsApp customer replies	Per administrative department	Zero training on client data

SECTION 04 • WORKFORCE & YOUTH DEVELOPMENT

Luffi Tech Academy & Hands-on Mentorship

In addition to software engineering, Luffi Tech operates a dedicated educational academy committed to mentoring the next generation of engineers, builders, and digitally proficient professionals through hands-on project work.

ACADEMY CURRICULUM: 3 SPECIALIZATION PATHWAYS

TRACK A PRACTICAL CODING FOR KIDS & TEENS (AGES 7 – 18)

- **Foundational Logic:** Scratch visual programming, computational algorithms, and logic puzzles.
- **Real-World Syntax:** Introduction to Python, interactive 2D games, web basics, and digital safety.
- **Outcome:** Transforms young minds from passive screen consumers into active creators and problem-solvers.

TRACK B DIGITAL LITERACY & OFFICE COMPUTER FOUNDATIONS

- **Workplace Productivity:** Microsoft Office (Word, advanced Excel modeling, PowerPoint) & Google Workspace.
- **Administrative Mastery:** Touch-typing, professional cloud file management, cyber hygiene, and business email.

TRACK C PROFESSIONAL FULLSTACK SOFTWARE BOOTCAMPS (ADULTS & PROS)

- **Modern Web:** React 19, Next.js, TypeScript, Tailwind CSS, REST/GraphQL APIs, and PostgreSQL.
- **Production Readiness:** Git/GitHub teamwork, CI/CD deployment, M-Pesa Daraja integration, and job portfolio review.

REMOTE MODE 1: INTERACTIVE ONLINE (GLOBAL)

- Live 1-on-1 and small-cohort classes via Google Meet.
- Full HD video recordings provided after each class.
- GitHub repository code reviews and continuous mentor feedback.
- Flexible evening and weekend hours for busy professionals.

IN-PERSON MODE 2: HOME TUTORING (NAIROBI)

- Premium personalized home tutoring across Nairobi.
- Vetted, background-checked, patient senior mentors.
- 100% focused attention tailored to student's exact learning pace.
- Ideal for young children and beginners requiring hands-on guidance.

OUR MENTORSHIP GUARANTEE: Every learner builds real, verifiable portfolio projects from Day 1. We do not teach abstract theory in isolation—students write code, push to GitHub, and deploy live web software.

SECTION 05 • CASE STUDIES & TRACK RECORD

Proven Client Impact & Case Studies

Our solutions are measured by operational hours saved, revenue protected, and systems empowered. Below are real-world commercial software engagements engineered and deployed by Luffi Tech.

CASE STUDY 01: HOSPITALITY & M-PESA DARAJA AUTOMATION

WESTLANDS, NAIROBI

Client Organization: High-volume dining venue • Sarah K., General Manager.
Operational Challenge: Peak rush cashier bottlenecks caused manual payment verification delays and accounting reconciliation backlogs exceeding 10+ hours per week.
Engineering Solution: Built custom ordering interface with automated Safaricom Daraja STK Push triggers and instant webhook callbacks syncing payments directly into cloud ledgers.
Measurable Results: **12+ hours saved weekly** in manual reconciliation; 100% elimination of payment disputes; transaction confirmation speed reduced to under 3 seconds.

CASE STUDY 02: ENTERPRISE LOGISTICS & CARGO DISPATCH PLATFORM

EAST AFRICA FLEET

Client Organization: Regional cargo and freight enterprise • David O., Operations Director.
Operational Challenge: Manual dispatch tracking, fragmented driver coordination, and lack of real-time cargo milestone updates leading to delayed client inquiries.
Engineering Solution: Developed a centralized cloud dispatch dashboard with automated route milestones, customer SMS notifications, and multi-branch management.
Measurable Results: **45% throughput boost**, zero cargo status errors, and 99.9% uptime across high-concurrency dispatch operations.

CASE STUDY 03: PRIVATE IN-HOME YOUTH CODING MENTORSHIP

KILIMANI, NAIROBI

Client / Learner: Primary school student (Age 10) • Wanjiku M., Parent & Educator.
Educational Challenge: Passive tablet consumption with no structured computational thinking or digital creativity.
Mentorship Solution: Weekly in-home mentoring covering Scratch visual programming, algorithmic logic, and Python game design with a vetted mentor.
Measurable Results: Student independently coded 3 playable original games; noticeable improvement in mathematics and analytical reasoning scores.

SECTION 06 • ENGAGEMENT & DIRECTORY

Corporate Credentials & Contact

Partnering with Luffi Tech is fast, transparent, and structured around your milestones. Here is our 3-step rapid onboarding framework to take your project from blueprint to production.

THE 3-STEP RAPID ENGAGEMENT ONBOARDING PROCESS

STEP 1: RAPID ARCHITECTURAL REVIEW (Within 2 Hours)

Send us your project brief or inquiry. A senior engineer analyzes technical feasibility, payment gateways, and architectural targets within 2 business hours.

STEP 2: 30-MINUTE DISCOVERY & ALIGNMENT CALL

We discuss specific user flows, payment integrations (Daraja / Stripe), infrastructure requirements, budgets, and launch timelines without sales jargon.

STEP 3: MILESTONE PROPOSAL & ROADMAP (Delivered in 24 – 48 Hours)

You receive a comprehensive, milestone-based technical proposal detailing sprint deliverables, transparent pricing, and deployment dates.
